

FAQ: Lead Agency Review (LAR)

DHS developed the HCBS Lead Agency Review (LAR) process to determine how these programs are operating and meeting the needs of the people they serve. This evaluation process helps DHS assure compliance by counties and tribes in the administration of HCBS programs, share performance on key measures and outcomes, identify best practices to promote collaboration between lead agencies. Included in this document are questions that are frequently asked of the DHS LAR Team.

Pre-Review

Who is reviewed and how frequently does a review happen?

Any lead agency (county or tribal nation) that administers Home and Community Based Services (HCBS) waiver programs. Each lead agency will be reviewed approximately every 3 to 4 years (this is called a “round”). The 5th Round of reviews launched in the spring of 2024.

How can I find out when my Lead Agency will be reviewed?

The lead agency review team posts a tentative schedule on the project website: [Round Five Lead Agency Review Schedule / Minnesota Department of Human Services \(mn.gov\)](#).

When will my agency be notified of a scheduled review?

Lead agencies are notified 60-90 days prior to the scheduled Lead Agency Review. The review process is meant to be collaborative in nature, as outlined by the LAR Foundational Principles.

Review

Will the review be done completely remote?

Effective 10/1/2024, the LAR team will be conducting lead agency reviews remotely. Meetings will be conducted in a virtual format using either Microsoft teams or WebEx. Documents for review will be shared with DHS via Axway, a secure file transport system.

What kind of data does the Lead Agency Review Team share as part of the LAR process?

The LAR Team shares annual Long-term Services and Supports (LTSS) data as part of the review, to evaluate Lead Agency performance with key outcome measures. Some of these dashboards and data are currently available to

the public and can be found on the [DHS partners and providers page](#) as well as the [Reports](#) section of the LAR Website.

Which case manager trainings are being monitored through attestation?

In Round 5 the Lead Agency Review Survey will include training assurances to be answered by one representative from the lead agency. The attestation assures all disability waiver case managers, including those employed by this lead agency and employed by private case management agencies under contract with this lead agency, completed the required training. The attestations will be for these three trainings:

1. Supporting my move: A case manager's role and responsibilities in supporting a person to find a new home (Available on [Trainlink](#))
2. Getting to work: A case manager's guide to support individuals to build and fulfill their vision for work (Available on [Trainlink](#))
3. Informed choice: Disability Waiver Case Manager Training (Available on Trainlink)

If these trainings have not been completed by all case managers, the lead agency will have 60 days to remediate by requiring all case managers complete the trainings. Lead agencies will not be required to remediate a training if their review is prior to the respective training being released. The lead agency is still expected to have all case managers complete the training by the due date.

I was asked to be a part of a focus group, what does that involve?

The purpose of the case manager and assessor focus group is to discuss trends, barriers and opportunities within the community and explore policy practices and protocols. Focus group details including agenda and materials will be sent out via email prior to the scheduled focus group. Additionally, prior to the focus group, participants will be asked to submit responses to questions via Padlet, an online message board platform. This helps to initiate and guide the conversation during the focus group.

Our staff would like to learn more about the LAR process and have questions, who should we contact?

The LAR Team looks forward to opportunities to work with Lead Agencies to prepare for a review whenever possible. We suggest lead agencies reach out to their Regional Resource specialists to inquire about LAR presenting at a Community of Practice or regional meetings near them. This allows LAR to meet with multiple lead agencies at once and maximize the opportunity for questions by lead agency staff. In addition, we welcome any questions via our LAR email at dhs.leadagencyreviewteam@state.mn.us

Case File Review

Are the cases the cases reviewed by the LAR team a surprise?

The lead agency review (LAR) team utilizes a random sampling strategy that includes 10% of cases by program; 10 cases; or all cases if there are less than 10 in a program – whichever is largest. For the largest few lead agencies, a sample size that reaches 95% +/- 10% significance is used. The LAR team sends a list of the cases that will be reviewed to the the lead agency primary contact approx 30 days prior to the review.

What will the LAR Team be reviewing in case files?

Case file review identifies compliance with program requirements for CAC, CADI, BI, DD, EW (MCO and FFS) and AC programs; assessing the quality and consistency of assessment and support planning by the lead agency. You can see the [List of items that are reviewed](#) by the LAR team by visiting the LAR project website and finding the case file review protocol.

What time period does the LAR Team review when looking at case files?

When the LAR team is reviewing case files, evaluators look at the previous 18 months of case notes, the most current assessment, and the current active support plan (MnCHOICES Revision Support Plan, CSP and CSSP or Collaborative Care Plan) that correlates with the current assessment.

What does the LAR Team mean by Support Plan?

The support plan document includes a signed and dated MnCHOICES Revision Support Plan, CSP and CSSP, or Collaborative Care Plan. When an individual is receiving CDCS an approved CDCS Plan is part of the support plan.

Does the LAR Team review Provider Support Plan/CSSP Addendums?

No, the LAR team does not review provider addendums or documentation of any kind. The LAR project's purpose is to review and monitor Lead Agencies, which does not include provider requirements.

When the LAR team is looking for a dream statement, does it have to have the word "Dream"?

No, the word "Dream" is not required to be used in a dream statement. The dream statement is required to be evidenced in the support plan. LAR is looking for a statement about the person's dreams, aspirations or long-term priorities that is future oriented. If the individual is non-verbal or otherwise unable to articulate a dream statement, it is appropriate to ask the guardian/family/caregiver, but the dream statement must be from the individual's perspective. "The guardian thinks they would like _____" vs "The guardian would like _____ for them."

What is considered to be a strength?

Specific positive behaviors, attributes, skills, gifts, and strengths about the person are described. This should be tied back to a description about the person such as "skilled cook" vs "loves to cook" or "Able to maintain strong relationships" vs "Having a supportive family".

When the LAR team is looking for “Rituals & Routines”, what information is LAR looking for?

LAR team is looking for a statement regarding regularly scheduled activities, daily preferences, or preferred routines. This information must include when the ritual/routine occurs such as daily, weekly, nightly, etc. Examples of meeting this measure would be: “... prefers to watch wheel of fortune weeknights” “...prefers to shower in the evenings”, “...enjoys a cup of coffee first thing in the morning”.

What items are currently monitored by the LAR team?

The [List of items that are reviewed](#) document on the LAR project website provides an overview of which measures LAR is currently monitoring. Any measures indicated with an asterisk (*) must be found in the individual’s support plan; this includes the monitoring statement.

What is the LAR team looking for in relation to “the monitoring statement”

Here is an example of a monitoring statement that would meet compliance: "Case Manager will develop and implement the support plan, make referrals for services, coordinate services, monitor the plan and make updates as needed"

When the LAR team is looking for needs identified, what are they looking for?

Historically with our legacy support plan tools LAR required the specific assessed need to be documented in the support plan. With the roll out of MnR we have shifted to requiring the **area of need** to be addressed in the support plan. For cases reviewed that have a legacy support plan (CSP/CSSP, Collaborative Care Plan) each specific assessed need should continue to be outlined within the support plan, avoiding phrases such as “all ADLs” or “total assistance”.

What is the Timeliness Measure?

Effective Jan. 1, 2020, the LAR team modified the monitoring of this measure. The support plan is required to be completed and sent to the person and or rep (if applicable) within 60 days of the assessment or eligibility update.

What if I was unable to obtain the individual/guardian’s signature for the support plan?

For Round 5, to more closely align with how the MCO’s measure compliance, the LAR team has unbundled the support plan signed and support plan completed measures. The support plan completed measures monitors if a support plan was completed within the time-frame outlined. The support plan signature measure monitors if the support plan is signed by all required parties: person, guardian (if applicable) and case manager/care coordinator).

Which provider signatures are the LAR team looking for?

The LAR team looks for provider signatures of those providers the person has identified that they want to share their plan with. For MnCHOICES Revision Support Plans, these are listed in the section titled “Providers – I would like my plan shared with the following provider(s).” For CSP/CSSPs, these are listed on the 6791D. Avoid using see “ROI” in this section of the 6791D and avoid listing providers the person is not currently using. If provider signatures are not found LAR team

will review case notes or MnCHOICES Revision Support Plan documentation to verify that at least 2 attempts to obtain signatures has occurred. For Individuals with legacy MCO CCP's, if the person indicates on the CCP signature page that they want to share the CCP w/ an identified provider(s) the file should contain a signature letter (template used by MCO's) or two documented attempts to obtain the signatures.

Do I need to use the person's name in the support plan?

The LAR team does not currently monitor for the use of the individual's name. An area that is measured includes the use of plain language. As defined, Plain Language is a communication which an audience can understand the first time they read or hear it, providing Minnesotans better services by reducing confusion, saving time, and improving satisfaction. To achieve that, the following steps must be taken:

- Use language commonly understood by the public.
- Write in short and complete sentences.
- Present information in a format that is easy-to-find and easy-to-understand.
- Clearly state directions and deadlines to the audience.
- Avoid the use of acronyms unless you spell it out first. For example, "John lives in a Community Residential Service (CRS) program. His CRS staff will..."

Do the goals in a support plan need to be SMART? Do they need to match the providers?

No. The LAR team monitors that the person's preferred outcomes, goals, and skills are documented in the support plan. The goals do not need to be attainable per se and are not required to match the goals outlined by providers.

Post-Review

Where can I find the final reports for previous Lead Agency Reviews?

Reports from [previous Lead Agency Reviews](#), including summary reports from the entire review can be found on the LAR project website in the findings section.

What is remediation?

While corrective actions are at a program level, remediation occurs at the case file level. When a case file is reviewed and found to be missing information, DHS requires lead agency staff to correct and amend case files to meet all monitored compliance measures. Lead agency staff are given 60 days from the end of the lead agency review to complete remediation. Lead agency supervisors, directors or managers are then asked to verify that the remediation is complete and notify DHS on what date the remediation took place. DHS provides this information to the Centers for Medicaid and Medicare when renewing waiver plans to show an overall culture of compliance.

What is a corrective action plan and when do I need to have it completed by?

Corrective actions are required when evidence of repeated non-compliance is determined through the case file review process. Corrective actions are issued to lead agencies and are programmatic rather than action needed on individual case files. Once a lead agency has received the final Lead Agency Review report for their review, lead agencies have 10 days to submit a Corrective Action Plan (CAP) to DHS. Lead agency's CAP must address each of the corrective actions identified in the report, including their plan to address each issue systemically with their staff. If a CAP is required, a template will be provided.
