Our Vision (Our Shared Aim)

*C.o.P. for Substance Use Disorder
improves care for clients and professionals by
creating connections that shape an effective system to help
people served achieve lasting recovery, health and wellbeing.*

Community Agreements (*How We Work Together*)

Our Work Begins with Care

Our care for others brings us to
the work of SUD treatment.

Our care for people living with
SUD, and their families and
communities, anchors every
conversation and decision.

We take care of ourselves so we
can show up for each other.

Lean into complexity.

We honor different contexts
and bring a problem-solving
mindset and collaborative
spirit to the CoP.

We build the future practice
of SUD treatment by
connecting people, stories,
and systems.

Creating new systems and
ways of working will require
everyone to think and do
differently at different
times.

Community Agreements (*How We Work Together*)

Respect Confidentiality

We share stories and examples in ways that protect the identities and dignity of clients, colleagues, and communities.

We carry insights and lessons forward instead of names and personal details.

Everyone is accountable. Everyone matters.

Every person is valuable and worthy of dignity and respect.

Our fates – and the fates of those we serve – are tied to our shared success.

Each person is accountable for their words, actions, and choices.

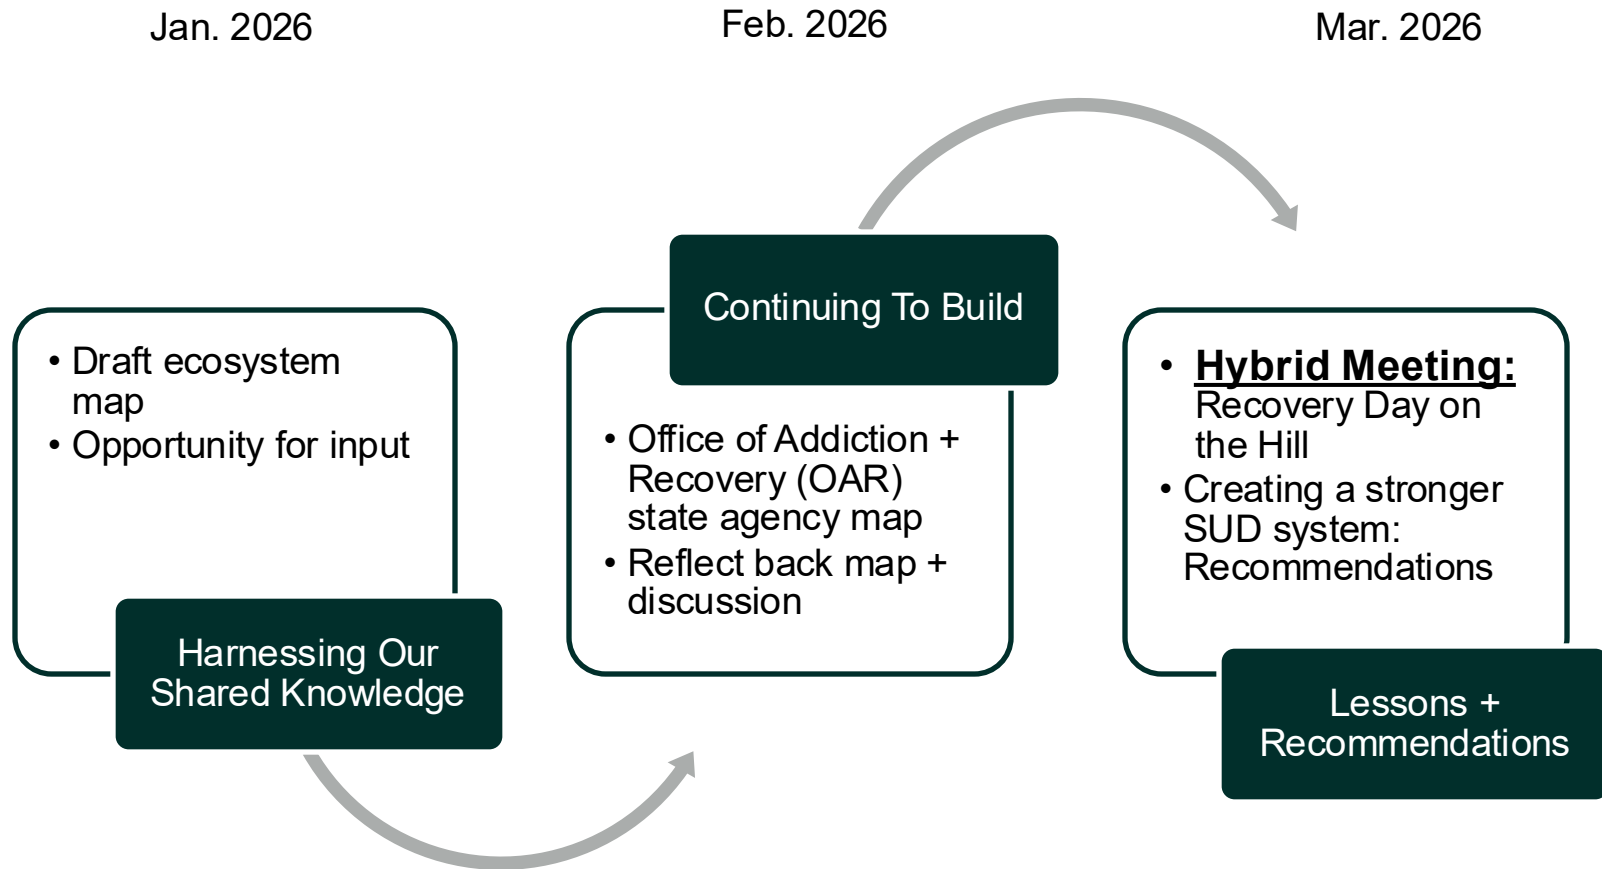

We share stories and examples in ways that protect the identities and dignity of clients, colleagues, and communities.
