

MinnesotaCare enrollees: Watch for a bill in the mail

Many Minnesotans covered by MinnesotaCare need to start paying monthly premiums this summer to keep their insurance.

Watch your mail for a bill from the Minnesota Department of Human Services. Enrollees must pay their premium by the due date to avoid losing their coverage. The first bill is due June 13, 2024.

Frequently asked questions

Q: How much is my MinnesotaCare premium?

A: It's listed on your monthly bill. You can use the table on the back of this page to estimate your monthly premium before your bill arrives.

Q: When is my monthly premium due?

A: Ongoing monthly premiums are due about the middle of the month. Your bill will list the due date.

Q: How do I make my payment?

A: Payments may be made online, by telephone or mail, or in person.

Q: What if I don't pay my premium?

A: You will have coverage for one more month if you do not pay your premium. That is a grace month. You must pay your monthly premium by noon on the last working day of the grace month to avoid a gap in coverage. Your coverage will end if you do not pay your premium by noon on the last business day of the grace month.

Step 1: Determine the monthly per-person premium.

- Find the column for your family size in the table.
- Move down the column until you find the range for your family's combined annual income.
- Move across the row to the last column on the right to find the monthly per-person premium.

Step 2: Determine the monthly premium for your family.

- Multiply the dollar amount from step 1 by the number of people in the household that owe a premium. The result is the total estimated monthly premium for your family.

Note: The following people pay a \$0 premium: people under age 21, American Indians and Alaska Natives and their family members, military members who have completed a tour of active duty within 24 months of approval for MinnesotaCare and their family members (for up to 12 months).
